

ISO 15764 2015

ISO 15764 2015 is a standard for the design and testing of USB connectors. It covers the design of the USB connector housing, the internal contacts, and the testing procedures for these connectors. The standard is applicable to USB connectors used in a wide range of applications, including consumer electronics, industrial equipment, and medical devices. The standard is divided into two parts: Part 1 covers the design requirements for the connector housing and the internal contacts, while Part 2 covers the testing procedures for these connectors. The standard is currently under revision, with the latest version being ISO 15764-1:2015 and ISO 15764-2:2015. The standard is published by the International Organization for Standardization (ISO).

About Us

10+ Years Experienced Professional Manufacturer of Customized Cables.

2000 M²
Factory space with 10 years of production experience

100+
Employees

OEM/ODM
Support cable customized

ISO 13585
Certified Medical Accessory Manufacturer

Certificate

We followed international ISO management Standard to make our custom cables, medical cables and chargers with good quality and best price.
