## USB

USB (Universal Serial Bus) is a standard for connecting devices to a computer or other electronic device. It is a type of bus architecture that allows for the connection of multiple devices to a single port. The USB standard is maintained by the USB Implementers Forum (USB-IF). The current version of the USB standard is USB 4.0, which was introduced in 2020. USB 4.0 is a combination of USB-C, Thunderbolt 3, and DisplayPort. It supports data transfer rates up to 40 Gbps and power delivery up to 100W. The USB standard is widely used for connecting peripherals such as keyboards, mice, printers, and external storage devices. The USB standard is also used for charging devices. The USB standard is a key technology for the modern computing environment.

## About Us

10+ Years Experienced Professional Manufacturer of Customized Cables.

2000 M<sup>2</sup>  
Factory space with 10years of production experience

100+  
Employees

OEM/ODM  
Support cable customized

ISO13585  
Certified Medical Accessory Manufacturer

## Certificate

We followed international ISO management Standard to make our custom cables, medical cables and chargers with good quality and best price.
