Our company is a professional manufacturer of various types of products. We have a rich experience in the field of product development and production. We can provide you with the most professional and efficient service.

We are a member of Goochain, a professional platform for OEM/ODM services. We can provide you with the most professional and efficient service. We also have a rich experience in the field of product development and production. We can provide you with the most professional and efficient service. We also have a rich experience in the field of product development and production.

Goochain OEM/ODM services. We can provide you with the most professional and efficient service.

## USB 3.0

USB 3.0 is a standard for data transfer, offering faster speeds than USB 2.0. It is commonly used for connecting external storage devices, printers, and other peripherals. The standard is supported by most modern operating systems and hardware. USB 3.0 cables are typically blue, and the ports are also blue. The standard is defined by the USB Implementers Forum (USB-IF) and is widely adopted by manufacturers. USB 3.0 offers a maximum data transfer rate of 5 Gbps, which is significantly faster than the 480 Mbps of USB 2.0. This makes it ideal for applications that require high-speed data transfer, such as video editing and large file transfers. The standard is also backward compatible with USB 2.0 devices, allowing for easy integration into existing systems. USB 3.0 is a key technology for modern computing, enabling faster and more efficient data exchange between devices.

## About Us

10+ Years Experienced Professional Manufacturer of Customized Cables.

2000 M<sup>2</sup>  
Factory space with 10 years of production experience

100+  
Employees

OEM/ODM  
Support cable customized

ISO 13585  
Certified Medical Accessory Manufacturer

## Certificate

We followed international ISO management Standard to make our custom cables, medical cables and chargers with good quality and best price.
