

USB

USB (Universal Serial Bus) is a standard for connecting devices to a computer or other electronic device. It is widely used for connecting peripherals such as keyboards, mice, printers, and external storage devices. USB cables are available in various lengths and types, including USB-A, USB-B, and USB-C. The USB standard is maintained by the USB Implementers Forum (USB-IF). The USB 2.0 standard supports data transfer rates up to 480 Mbps, while USB 3.0 and USB 3.1 support up to 5 Gbps. USB 4.0, introduced in 2020, supports up to 40 Gbps. The USB standard is also used for power delivery, allowing devices to be charged through the USB port. The USB standard is defined by the ISO/IEC 11801 standard.

About Us

10+ Years Experienced Professional Manufacturer of Customized Cables.

2000 M²
Factory space with 10years of production experience

100+
Employees

OEM/ODM
Support cable customized

ISO13585
Certified Medical Accessory Manufacturer

Certificate

We followed international ISO management Standard to make our custom cables, medical cables and chargers with good quality and best price.
