USB 3.0

USB 3.0 (SuperSpeed) is a standard for USB connections, providing faster data transfer rates compared to USB 2.0. It is commonly used for connecting external storage devices, such as hard drives and SSDs, and other peripherals. The standard is supported by various manufacturers, including Targus, and is often used in conjunction with PoweredUSB technology. USB 3.0 cables are available in various lengths, typically ranging from 80cm to 1.8m. The standard is defined by the ISO/IEC 15926-1:2015, which specifies the physical and electrical characteristics of the connector and the cable.
