## USB 3.1

USB 3.1 is a standard for USB connectors and cables. It is designed to be backward compatible with USB 2.0 and USB 3.0. The standard is defined by the USB Implementers Forum (USB-IF) and is currently in the final stages of development. The standard is expected to be finalized in 2015. The standard is designed to support data transfer rates of up to 10 Gbps. The standard is also designed to support power delivery of up to 100W. The standard is also designed to support video transmission of up to 4K resolution. The standard is also designed to support audio transmission of up to 32 channels. The standard is also designed to support a variety of other features, including: 

- USB Power Delivery (USB-PD)
- USB Type-C to USB Type-A adapters
- USB Type-C to USB Type-B adapters
- USB Type-C to USB Type-C cables
- USB Type-C to USB Type-C connectors

## About Us
