

As a trusted OEM manufacturer of custom medical cables, we are proud to introduce our DB15 Female to 13-Lead 4.0mm Snap ECG Electrode Cable—a robust, high-performance solution designed to deliver accurate, multi-channel signal transmission for modern medical monitoring systems.

Whether you're building ECG modules for patient monitors or integrating multilead diagnostics into wearable tech, this cable is built to meet your exact technical and operational demands.

Key Features:

- **13-lead output with medical-grade 4.0mm snap connectors** ensures secure, stable connection with a wide variety of ECG electrodes and pads
- **Robust DB15 female connector** enables compatibility with hospital-grade ECG monitoring systems and OEM diagnostic equipment
- **Electromagnetic shielding layer** minimizes noise and interference during transmission, providing clean and reliable biopotential data
- **Built using high-flex, ECG-grade lead wires** designed for consistent performance in clinical and research settings
- **Full OEM/ODM customization** available, including connector types, lead configuration, wire length, jacket color, and private labeling
- **Manufactured with biocompatible TPU or PVC insulation** to ensure safety, flexibility, and long-term patient comfort

If you're looking for cable with fewer leads but similar highquality performance, we also offer the [DB9 to 4.0mm Female Snap ECG Cable](#). It's ideal for more compact setups where fewer channels are required, but still delivers excellent EMI protection and signal integrity. On the other hand, for more extensive monitoring systems, the [DB25 to 4.0mm Female Snap ECG Lead Cable](#) might be a better option, offering up to 25 leads for those needing higher capacity with the same premium shielding to avoid signal loss.

All our cables can be customized with your branding, colors, cable length, connector type, and packaging preferences. Whether you're developing medical-grade cables for hospital equipment or wearable health technology, we're here to support your product journey from prototype to mass production.

Company Introduction

About us

10+ Years Experienced Professional Manufacturer of Customized Cables.
