

## Product Specification

This universal nurse call cable is designed with a **customized 5P pogo pin connector**, developed and manufactured based on specific nurse call system requirements. The pogo pin structure, pin layout, spring force, and contact length can be customized to ensure stable electrical contact and precise signal transmission. This design helps reduce connection failure caused by frequent use and improves long term reliability in medical environments.

The single push button features an ergonomic design with suitable actuation force, allowing easy operation for patients, elderly users, and individuals with limited mobility. The cable is made of medical grade PVC material, offering excellent flexibility, abrasion resistance, and extended service life for hospital and healthcare applications.

## Application

This nurse call push button cable is widely used in hospital nurse call systems, patient bedside call units, nursing homes, elderly care facilities, rehabilitation centers, clinics, and other healthcare communication systems. It is suitable as a replacement nurse call cord for customized nurse station interfaces and non standard pogo pin connection solutions.

## Manufacturing and Customization

As a professional manufacturer with strong in house R and D capability, we specialize in **custom pogo pin nurse call cable solutions**. We support **OEM and ODM services** including pogo pin pin count customization, pin spacing, spring force adjustment, connector housing design, cable length, button appearance, logo branding, and packaging. With strict quality control and stable mass production capacity, we provide factory direct supply to global medical device brands, system integrators, and distributors.
