

As a professional manufacturer of custom pogo pin cable assemblies, we are proud to introduce our latest innovation – the Type-C to Spring Loaded Pogo Pin Cable with FPC structure. This next-generation solution is designed to overcome the limitations of traditional round-wire pogo pin assemblies.

What Makes It Unique

- **Flexible Flat Cable (FFC/FPC):** Offers high elasticity and can withstand frequent bending without damage. Perfect for applications with limited space or dynamic movement.
- **Spring Loaded Pogo Pins:** Ensure a stable and reliable contact interface, ideal for both power delivery and signal transmission.
- **Universal Compatibility:** Fully compatible with USB Type-C devices including smartphones, tablets, medical devices, test instruments, and docking stations.
- **Lightweight & Ultra Thin:** The use of FPC makes the entire cable slim, which is especially suitable for compact or embedded systems.
- **Custom Design Support:** Whether you need to adjust pin numbers, connector types, or even require full OEM branding – we provide flexible solutions to meet your needs.

With over 10 years of experience in connector and cable assembly manufacturing, we combine strong R&D capabilities with fast-turn prototyping and mass production. Our engineering team can assist you in evaluating feasibility, circuit design, and mechanical structure optimization
