The Flat USB to Console Cable with FTDI Chipset, manufactured by Goochain, is a professional-grade RS232 serial debug cable designed for configuring and managing network and industrial devices. Its tangle-free flat cable design ensures convenience during installation, maintenance, and transport — especially in field applications and data centers.

Built around the FTDI FT232RL chipset, this USB to console cable offers full driver support and stable performance across multiple platforms, including Windows, macOS, and Linux. The USB Type-A to RJ45 connection allows direct access to the serial interface of devices via standard RJ45 console ports, making it a critical tool for system integrators, test engineers, and electronics developers.

Unlike generic adapters, Goochain's solution is a true FTDI USB to Serial Cable, offering reliable communication for long-term use. This product is widely used in projects requiring USB to TTL cable functionality, embedded debugging, or custom USB to DB9 adapter replacements. It also serves as a practical alternative to round cable designs when flexibility and compact storage are key considerations.
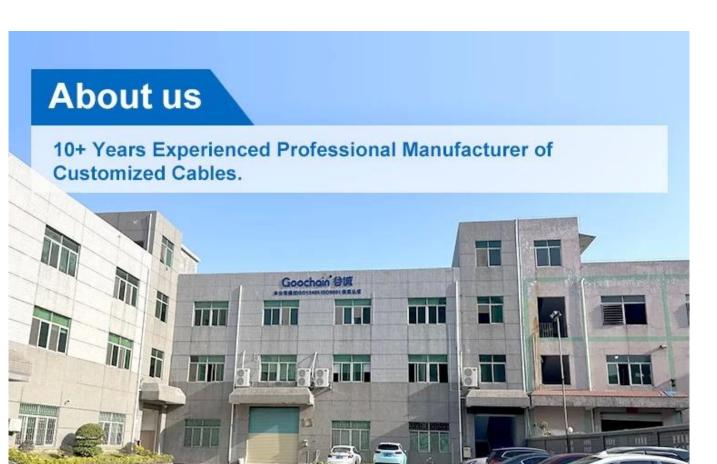

As a leading USB cable factory in China, Goochain offers full OEM/ODM customization — including USB to TTL serial cable, USB to RJ45 adapter, FTDI USB programming cable, and USB to RS485 cable variations. We supply both standard and custom products for clients in industrial control, telecom, automation, and embedded hardware sectors.

Whether you are a networking cable supplier, serial cable manufacturer, or OEM electronics vendor, Goochain delivers factory-direct quality with competitive pricing and global support.

Company Introduction

About us

10+ Years Experienced Professional Manufacturer of Customized Cables.

3000 M²	100+	OEM/ODM	IOS13485
Factory space with 10years of production experience	Employees	Support customized	Certified Medical Accessory Manufacturer
