

## Advanced EEG Cap for Precise Signal Acquisition

Traditional EEG setups often require time-consuming electrode placement, leading to delays in data collection. Our EEG electrode caps address this challenge by integrating electrodes into a pre-configured cap, allowing for quick and accurate positioning. This design not only saves time but also reduces the potential for human error during setup.

## Versatile Applications Across Multiple Domains

- **Neurorehabilitation:** Monitor and assess brain activity during rehabilitation therapies.
- **Cognitive Research:** Investigate cognitive processes and neural mechanisms.
- **Consumer Neuroscience:** Explore brain responses to consumer products and experiences.
- **Neurofeedback:** Provide real-time brain activity feedback for therapeutic purposes.
- **Clinical Diagnostics:** Aid in the diagnosis and monitoring of neurological disorders.

## Customization to Fit Your Needs

As a manufacturer, we offer **OEM/ODM services** to tailor the EEG electrode cap to your specific requirements. Whether you need a custom electrode layout, unique cap size, or specific connector type, our team is equipped to deliver a solution that aligns with your research or clinical objectives.
