

Our round Magnetic Pogo Pin Connector ensures a reliable charging experience with its strong magnetic field and high-quality materials. Featuring a female connector, this component is optimized for use in various industries that require consistent and fast charging solutions.

Key Features:

Magnetic Connection: Secure, quick connection mechanism for easy docking.

Durable Build: Stainless steel and nickel plating for longevity.

High Power Support: Up to 2A current handling capacity.

Custom Length Options: Flexible cable lengths for your project requirements.

Versatile Use: Ideal for USB charging stations, mobile devices, power banks, etc.

This product is perfect for businesses seeking reliable components for OEM applications, including electronic manufacturers, product designers, and developers. We offer competitive pricing, bulk order discounts, and fast shipping from our factory in Dongguan, China.

Application:

USB charging docks and stations

Power banks and portable chargers

Electronic product development
