

Product feature

Our [Type-C to EEG suction electrode cable](#) is engineered for medical and therapeutic applications requiring precise brainwave signal acquisition. Equipped with **6 Ag/AgCl suction cup electrodes** and **2 metal ear clip electrodes**, this cable set is suitable for both clinical and research-grade **EEG recording, neurostimulation, and tDCS/tACS therapy** setups.

- **Type-C Interface:** Ensures compatibility with modern neuro devices, tablets, and USB hubs used in digital brain-computer interface (BCI) systems.
- **Ag/AgCl Suction Electrodes:** High signal fidelity and low impedance make these ideal for prolonged EEG sessions.
- **Stainless Steel Ear Clips:** Reliable grounding and reference signal acquisition.
- **OEM/ODM Support:** As a **direct manufacturer**, we offer complete customization from concept to finished product — including private labeling, connector modifications, and custom packaging.
- **Certified Quality:** Manufactured under **ISO 13485** (medical device quality) and **ISO 9001** standards.

Feel free to contact us to learn more about our [Type-C medical cable](#). We can provide samples, technical datasheets, and a quotation upon request.

Why Choose Us:

- **OEM Manufacturer:** In-house R&D and production ensure high quality, fast lead time, and competitive pricing.
- **Certified for Medical Use:** Fully compliant with **ISO 13485** and **ISO 9001**, ensuring safety and reliability.
- **Expert Customization:** From connector types to electrode configurations, we support your unique application needs.
- **Global Supply Experience:** Trusted by B2B clients worldwide in medical, wellness, and

research sectors.
